

**Help us to deliver the next phase of the COVID-19 vaccination programme**

# **Additional paid hours available supporting the 12-15 year old vaccination programme**

We are currently rolling out the next phase of the COVID-19 vaccination programme for school children aged 12-15 years. This is offering a single dose vaccination to around 48,000 children in Manchester and Trafford at 50 separate school sites.

**We are asking for help from staff who may be able to help administer and prepare the vaccine or provide administrative support to the team delivering this national programme to local children.**

The team are using the national protocol, so vaccinators do not necessarily need to be registrants but will be fully supported by registered staff on site.

Sessions will run daily in schools (hours approximately 9am to 3pm) in both Manchester and Trafford.

**If you are able to support this vaccination programme by working additional paid hours, please book a shift through NHSP or contact the Children's COVID 19 vaccination team for more information via:
